

Cellio Managed Services

COLLECT, COMMUNICATE, CONTROL

Cellio provides a vast array of managed services offerings. From assisting in the design/development of customized products, to assisting in the carrier certification processes, to activating and provisioning lines, to connecting, communicating, and assisting in the analytics and display of data. Cellio can provide services whether you use Cellio products or not. With a “one neck to choke” methodology, if you are looking for a turnkey approach that encompasses devices, service, back-end, data hosting, and data reporting, then Cellio is your solution.

MANAGED SERVICES

- Cellular (3G CDMA/4G LTE*) activations/ provisioning
- Data hosting, dashboarding, analytics, alerts and notifications
- VPN connections for Private Network
- API connectors to enterprise systems
- Support for Tier 2 through Tier 4

OUR CUSTOMERS PREVIOUS PROBLEMS

“Dealing with all the different vendors and suppliers that were required to connect simple devices from the field to our back-end systems was driving us crazy and costing us a ton.”

• LARRY •

“We needed a way to simplify billing, reporting, and diagnosing issues when customers were installing our devices in their homes/businesses. We really need one place to call to solve everything.”

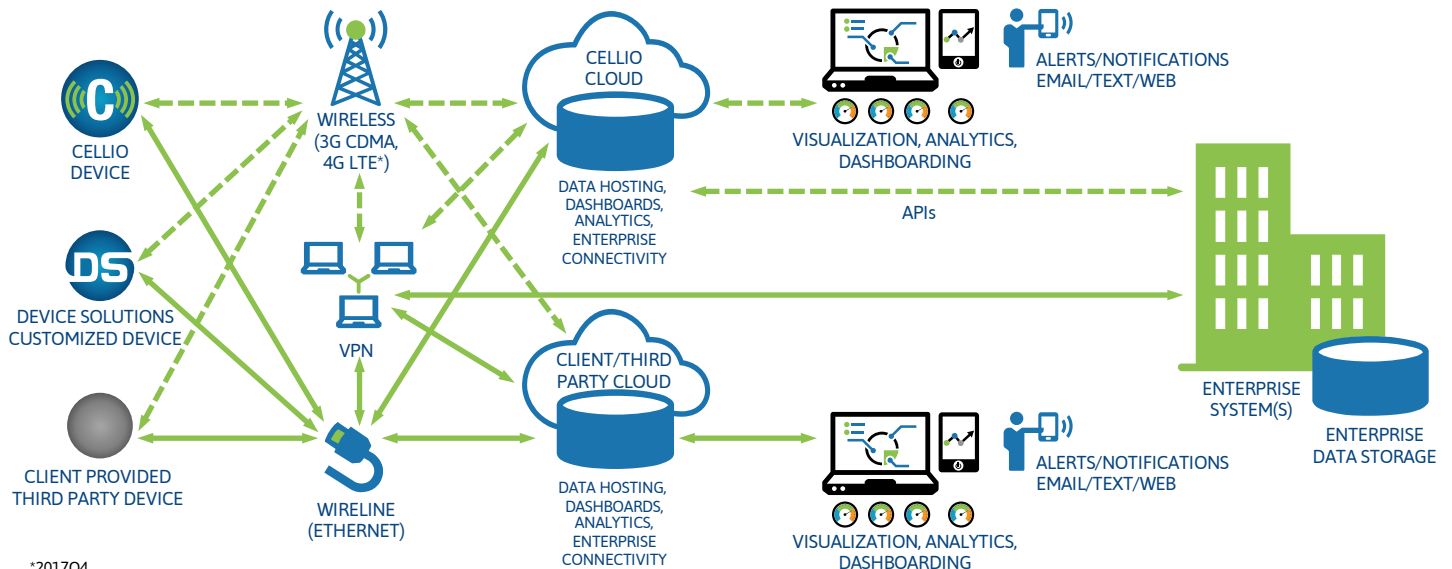

• JOHN •

“With everyone pricing things separately, we realized it was costing us a fortune to remotely monitor and report on the status of everything”

• BARBARA •
